Policy 7410 MAINTENANCE AND REPAIR

The Board of Education recognizes that the fixed assets of this district represent a significant investment of this community; their maintenance is, therefore, of prime concern to the Board.

The Board will develop, approve, and implement a comprehensive five-year maintenance plan.

The maintenance Superintendent shall develop and implement a maintenance program that includes the annual inspection of buildings to insure adherence to health and safety laws, a regular summer program of facilities repair and conditioning, the maintenance of a critical spare parts inventory, an equipment replacement program, and a long-range program of building modernization. Any substandard classrooms will be upgraded in accordance with law and rules of the State Board of Education, or eliminated.

The maintenance program shall provide for the continuing upkeep of the physical plant and for the expeditious repair of those conditions that threaten the safety of the occupants or the integrity of the plant. Wherever possible and feasible, maintenance will be preventive. The maintenance Superintendent will establish priorities among the requests for repairs received from building principals.
